Nov 2, 2010 I can't understand why you say to download World Editor -> Windows games manager -> Anno 1404: Venice +7 -> show all contents, to install the extension (or to go into the editor's folder -> options -> ext and select the path of your game). I use the.exe from an official site, and I have all the content of Venice +7 and can place, create and edit all the tileset that exist in the game. Jul 11, 2010 I can't download the world editor at www.disconet.com, there's no download button for this one... Anyone able to provide me with the.exe to do it with directly? I tried, it doesn't work (no launch image loaded)... 1. Go to www.disconet.com and create a new account. 2. Go to download page for anno 1404 world editor, click on register button to register an account at disconet July 14, 2010 The world editor in COD4 (online version) is working, but it's only available with the Steam version. I have searched the internet and have found several others who want to use the editor (mainly for living isles only) with COD4, but I have yet to find one that works perfectly. My problem: the world editor only works if the game is installed as steam (proxied version), and I want to use it for COD4 through an optical disc (full game version). Any idea about how to use this world editor? May 29, 2010 I'm trying to install the WorldEditor for Anno 1404, but I can't find this on the official website for the game. Can someone please inform me about this?
