
Xi Freedom Dive Mp3 16 Freedom Dive is a Hip Hop song released by J. Cole in 2015. It features an audio sample from a speech given by Dr. Martin Luther King Jr., which says the following: "In every society, the majority always oppresses the minority". This is followed with a line from Migos's song called "Motor Sport" talking about freedom through hip hop as well as freedom through auto mechanics. In this freedom dive, Cole dives into both of those ideas as well as discussing how to overcome struggle and lack of success in life by never giving up on dreams and continuing to work hard at them despite what you might have been told. He discussed this concept on his debut album, Cole World: The Sideline Story, as well as his third album 2014 Forest Hills Drive. In Freedom Dive, he dives into practicing what he preaches and struggles to overcome the struggle that has been placed upon him. This song is accompanied by a music video of the same name. The first verse talks about how people choose to be negative and not understand the concept of being positive. He said you have to choose your attitude because nobody can choose it for you. The first verse also talks about how he came from a place where being a rapper was frowned upon and discouraged by everyone around him, but never gave up his dream to become a rapper. The second verse talks about how he went from a small town to a major city and made a name for himself. He expresses his amazement at being able to have achieved so much in his life in such a short amount of time. He says that when people have been given the chance, they should not let it slip away from them because things can always change. In this verse, Cole talks about how nobody could understand his desire to do something that no one ever did before, but he worked hard and lived by what he preached all along. The third verse talks about how people sometimes say bad things about others who are trying to achieve their dreams. He expresses how this is very ignorant because people simply do not understand what is truly going on. He says people are quick to use others as an example of failure even though it is often not true. As an example, he uses himself as an example of someone who was told that they would never make it in hip hop music, but he persevered despite the opinions of others and made it all the way up to number one on the Billboard charts. The fourth verse talks about how there are always going to be people holding you back from your goals, but if you keep trying, success will eventually come your way after you overcome all of the struggles that are placed before you. He takes this concept one step further in the fifth verse, saying that it is better to be defeated by your own struggles. The sixth verse talks about how everyone who has ever passed on their dreams has ended up becoming a failure. He compares this to the city of Chicago, which was once called The Windy City, until it was changed to Chicago in 1837. He says that people are continually trying to change Chicago by referring to its early history because they are unable to understand something when its history is still fresh in their minds.
